## **Outbuilding Clarification**

The policy regarding Outbuildings will be as follows: Structures that are permanently attached to either the house, deck or existing patio (attached to the house), would not be considered an Outbuilding. Examples of these attached structures could include pergolas, gazebos, or other similar patio covers. The Association's definition of Outbuilding does not impact the City's permit requirements for structures placed on your property.

Additionally, garbage can enclosures are allowed, provided that they meet the following criteria: The color must coordinate and be aesthetically compatible with the house. The enclosure must be anchored to a sturdy foundation located adjacent to the house.
